EDUCATION

Institute of Engineering and Technology, Calicut University　　　Thenhipalam, Kerala
Bachelor of Technology, Information Technology　　　*Aug. 2019 – July 2023*

GHSS Chathannur　　　Chathannur, Kerala
Higher Secondary　　　*June 2017 – March 2019*

PROJECTS

Thrifty | *React, Tailwind CSS*　　　September 2024 – December 2024
- Developed a car leasing web platform for Dubai with a modular, component-based architecture using React and Tailwind CSS, allowing users to seamlessly browse and lease vehicles.
- Enhanced performance through efficient state management and dynamic, reusable UI components, resulting in a lightweight, fast, and highly responsive application.
- Created a visually appealing and intuitive interface, applying advanced Tailwind CSS styling techniques to deliver a modern, user-centered experience across devices while ensuring scalability and maintainability.

Wedded | *Python Django, Flutter*　　　August 2022 – July 2023
- Developed a mobile application which acts as a robust and comprehensive tool for simplifying the intricate process of wedding planning
- The system is implemented using Flutter for the frontend and Django Python with MySQL for the backend
- Utilized SVM algorithm for precise vendor classification, optimizing the categorization of vendors
- Developed an intuitive user interface (UI) with a user-centric design approach, resulting in an aesthetically pleasing and user-friendly experience

EXPERIENCE

Jr. Frontend Developer　　　March 2024 – Present
Diffrenz Business Solutions　　　*Kochi, Kerala*
- Designed fluid, responsive layouts using CSS Grid and Flexbox, ensuring accessibility and intuitive user experiences. Developed components like accordions, modals, and SVG-enhanced inputs.
- Built reusable React components, including tab switches and search bars, and implemented animations with Framer Motion for seamless transitions and improved interactivity.
- Delivered projects within tight deadlines, mastering advanced UI/UX techniques such as responsive grids, form validation, and utilizing Material-UI and Tailwind CSS for efficient design implementation.

Jr. Product Engineer　　　August 2023 – October 2023
Efeone Private Limited　　　*Eranhikkal, Kozhikode*
- Contributed in Developing a web application using Frappe Framework,designed for connecting students and alumni of Farook College
- Implemented HTML, CSS, and JavaScript within the Frappe framework to create a user-friendly platform
- Created Python functions to implement various essential features and functionalities, enhancing the overall functionality and user experience of the application

INTERSHIPS AND CERTIFICATES

- 10 Days Internship in Cybersecurity Ethical Hacking — Techbyheart India Pvt Ltd Kochi
- Hackathons and workshops IEDC,IETCU — Participated in each program conducted with the aid of IEDC, 2-day hackathon

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+)
Frameworks: React.js, Tailwind CSS, React Native, Frappe
Developer Tools: Git, VS Code, Figma, Chrome DevTools
Concepts: Responsive design, component-based architecture, UI/UX best practices, performance optimization, cross-browser compatibility
